

Introduction of the Common Subjects of Graduate School of Engineering organized by ER center.

Exercise on Project Management in Engineering (subject on the 2nd term)

The objective of this course is to build a virtual inter-engineering project by **intensive group work**, presentations, and a few intermediate discussions.

The details can be available on the SYLLABUS.

Students Impressions

Q1: What were the most important things?

A1: Teamwork skill,
Making a roadmap,
Be flexible.

Q2: What was the most challenging thing?

A2: Getting real/specific numbers to in the execution of the project.

Q3: Please give a short advise to the future students.

A3: This subject will be useful for students who want to know how to work as a team and deal with people in different fields.

This is one of the most practical courses. I urge you to take on the project management journey.
